

Get Started

ProLink, an app launched two years ago to help business professionals connect and engage with their customers, has recently noticed a decline in user retention over the past few months. Concerned about maintaining strong business relationships and preventing customer disengagement, ProLink has provided data related to user activity and churn from the previous month and tasked you with conducting a comprehensive analysis.

The company wants to analyze this dataset to uncover patterns and insights related to customer churn. By identifying the specific segments and usage patterns associated with higher and lower churn rates, you will help ProLink implement targeted strategies to enhance user retention, optimize customer engagement, and improve overall satisfaction with the app.

Objective

Key areas to focus on in your analysis include:

Tenure: Is there a relationship between how long a customer has been using ProLink and their likelihood of churning?

Plan Type: Which plan type (Month-to-Month, Half-Yearly, or Annual) has the highest and lowest churn rates?

Customer Type: Do Entrepreneurs, Influencers, or Startups experience higher churn rates?

Stage: How does the churn rate differ between Established and Emerging businesses?

Use this data to segment the customers and uncover insights that will help ProLink reduce churn and improve customer retention.

Data

You have been provided with the a sheet named 'Data_CustomerChurn' which has the following details:

CustomerID: Unique identifier for each customer.

CustomerType: The type of customer (Entrepreneur, Influencer, Startup).

Stage: The business stage of the customer (Emerging(0) or Established(1))

Tenure: Number of months the customer has stayed with the company

Plan: The contract term of the customer (Month-to-month, One year, Two year)

PaymentMethod: The customer's payment method (UPI, Debit or Credit Card)

MonthlyCharges: Last month charges customers have paid.

TotalCharges: Total Charges collected from the customer over the tenure

Churn: Indicates the churn status of customers. "Yes" means the customer has churned; "No" means they have not.

| CustomerID | CustomerType | Stage | Tenure | Plan | PaymentMethod | MonthlyCharges | TotalCharges | Churn Status |
